(b) whether it will lead to further sickness of textile mills,

(c) whether it is a fact that there is a cent per cent increase in the export of cotton, and

(d) whether Government considered the option of exporting cotton yarn a semi-finished product instead of exporting raw cotton on a big scale?

THE MINISTER OF TEXTILES AND FOOD PROCESSING INDUSTRIES (SHRI HUKUMDEO NARAYAN YADAV): (a) and (b) The prices of textiles are determined by market forces of demand and supply, apart from the cost of various inputs and duty structure There is a possibility of hike in taxes being partly absorbed by manufacturers. There are various reasons for sickness in textile industry Therefore, hike in taxes may not necessarily lead to further sickness However, Government is keeping a constant watch on prices of textiles

(c) and (d) The release of export quota of cotton is decided keeping in view the surplus available after meeting the domestic requirement The export quota of cotton released so far in the current year is less than that of last year. Government has also been encouraging and providing incentives for export of value added items like yarn, fabrics, made-ups etc.
